WESTERN DIVISION

Environmental Planning, Permitting, Compliance, and Closure

Since 1995, Strum has been a trusted provider of engineering, surveying, and environmental services to corporate, private, oil and gas industry, and government clients. With a team of 160 specialists including engineers, environmental professionals, hydrogeologists, scientists, surveyors, and project managers we deliver practical, results-driven solutions that keep projects moving forward.

Strum has supported Western Canadian clients for over eighteen years. Our team supports projects across the energy, natural resources, industrial, infrastructure, and development sectors. From early-stage planning and baseline assessments to permitting, construction monitoring, operational compliance, and closure we help clients navigate environmental requirements, manage risk, and maintain project schedules.
